Experience

Backend Engineer at [STATISTICS AGENCY](#)

Feb 2024 – present

- Developed a GIS project using Django to display statistical information such as population and gender distribution by region. It uses GeoJson to render the map and MongoDB is used.
- Upgraded the site with millions of users, indexed the database and rebuilt the system design.
- A Unified State Register has been developed for the registration of any organizations

Backend Engineer at [ICT Academy](#)

Feb 2023 – Feb 2024

- Worked with a team on local large and small projects as Freelancer
- A short time LMS system was developed for the university.

Backend Engineering Intern at [Soff Study](#)

Oct 2022 – Jan 2023

- A math program has been developed to prepare students for university (Python, Django, PSQL).
- Has competent knowledge of deploying the project to the server.

Projects

Marketplace Platform

Create a basic version of a marketplace like **Uzbekbazar**, where users can list products, buy/sell items, and have user accounts. This could demonstrate your knowledge of Django and databases, and integrate with payment gateways.

Delivery and tracking service

TRUMF is a legal letter delivery service. In this project, we need to generate a file using data from Excel with Django Celery.

Education

Tashkent State Transport University

Oct 2022 – May 2026

B.S. in Economy, Focus on Algorithms and Data Structures, Object-Oriented Programming, Python and Math

Skills

Programming Languages: Python, Go core, SQL, JavaScript, HTML, CSS

Technologies and Frameworks: Django, Fast API, Nginx, Git

Awards

4th place in the AI Hackathon (with Surdo AI)

2024

Startup Winner at Innovative Development Agency(with TRIUMF project)

2023
